

Vacuum Unit

Used for the degassing of RTV silicone rubber and various resins.

The unit is fitted with a clear Perspex lid together with a vacuum gauge and relief valve. The vacuum pump supplied is fixed to the unit below the vacuum tank. This pump is suitable for use on domestic power supply.

Nylon casters are fixed to the base to enable easy movement.

Standard dimensions are:

Tank diameter:	13 inches
Tank depth:	15 inches
Unit height:	36 inches

The vacuum unit is delivered ready for use. Delivery is ex-stock, subject to prior sale.

Note:

Oil for the vacuum pump can be supplied when required. When purchased the vacuum pump will have the correct level of oil.

To prevent accidental oil spillage, always ensure the pump is carried by the handle and is held level.

Jacobson Chemicals provide after sales service, which includes technical assistance and the service of the pump or unit when required. We can also supply a new pump for your existing unit.
